About Meta

The average employee wastes four hours each week searching for and recreating lost documents. Finding files should be as simple as a Google search, no matter where they're stored.

Meta allows you to seamlessly search for, access, and share files across all cloud platforms and devices. Our search engine learns and improves itself as you interact with it, leveraging natural language processing and automatic tagging to provide accurate results every single time. We just closed an early stage funding round and are excited to grow our core team.

About You

You may not see the perfect fit in our existing job descriptions, but you love our product and want to be involved. You are excited about revolutionizing the way people interact with their files and have a concrete idea of how you can help us get there.

Requirements

- Excellent communication and discussion skills
- Familiarity with working in an agile development environment
- Flexibility, adapting to changing priorities and learning new languages as necessary

Potential Roles

Meta offers challenges in user experience design, marketing, consumer behavior, and nearly every area of software engineering. If you think you would be a good fit, we can't wait to hear from you!

We Offer

- A great product supported by prominent investors and enthusiastic early adopters
- Ground floor entry to an exciting project on which you will have a huge impact
- A friendly, challenging, and collaborative work environment
- Compensation commensurate with experience and ground floor stock options!
