

Search Engineer

Boston, MA
careers@meta.sc

About Meta

The average employee wastes four hours each week searching for and recreating lost documents. Finding files should be as simple as a Google search, no matter where they're stored.

Meta allows you to seamlessly search for, access, and share files across all cloud platforms and devices. Our search engine learns and improves itself as you interact with it, leveraging natural language processing and automatic tagging to provide accurate results every single time. We just closed an early stage funding round and are excited to add a domain expert in search to the core team.

About You

You know search algorithms and have applied them in a commercial setting. You can dive into elaborate datasets and architect the algorithms behind modern search. You are excited to use your mathematical and algorithmic background to help us fix file management.

Requirements

- The ability to write clear, concise code
- Practical experience using machine learning techniques to improve search capabilities
- A strong desire to create new technologies combined with a passion for fast, accurate search
- Excellent communication and discussion skills
- Flexibility and the ability to learn new skills and languages as necessary
- Familiarity with working in an agile development environment
- A BA/BS degree in Computer Science, Mathematics or Engineering, or relevant work experience

Job Overview

Meta consists of a fast, responsive web interface and lightweight local client applications. We use natural language processing and probabilistic classifiers to automatically generate and apply tags to files based on relevant concepts and user habits. Instant, reliable search is the primary interface through which users find their files, wherever they are.

Our backend is written in Go and Python and runs on the Google Cloud Platform. Our local clients are native applications that interface with our web services to facilitate workflow integration. Blazing fast and accurate search is critical. This project presents an opportunity for you to take the lead in creating a brand new search experience.

We Offer

- A great product supported by prominent investors and enthusiastic early adopters
- Ground floor entry to an exciting project on which you will have a huge impact
- A friendly, challenging, and collaborative work environment
- Compensation commensurate with experience and ground floor stock options!
